## Amicale of the Council of Europe

As you know, more than 40,000 individuals are in need of complex operations or prosthetics in Ukraine. Unfortunately, these patients are spread out across the country and the state is only able to cover the needs of part of them.

As part of the initiative, the Superhumans Center has constructed a state-of-the-art medical center in the city of Vynnyky, Lviv Region, Ukraine. The first hospital block includes rehabilitation facilities, a prosthetics department, and a prosthetics production unit. The opening of the second block, where the reconstructive surgery department will be located, is planned soon.

The mission of the Center is to advance Ukrainian expertise in prosthetics and high-tech medical procedures and bring the best medical practices to Ukraine.

We are very grateful to Amicale of the Council of Europe and its Ukrainian section, as well as all diplomatic representations that participated in the charity event organized to support our Center. Special thanks to the association PromoUkraine for their support and facilitation of the realization of this charity project.

We assure you that your donation will be used to restore the lost abilities of 15 patients through high-quality rehabilitation, and we will ensure complete transparency in all financial matters.

Thank you for your compassion and commitment to making a difference. Your support will enable us to significantly impact the lives of those who have suffered from the atrocities of war.

**Sincerely yours,**

**CEO**

**Olga Rudnieva**
